— Changing perceptions —

As a young and dynamic company, Sandhelden set the goal of creating inspiring products through innovation and unique forms.

Sandhelden achieves this goal by using the combination of sand and 3D printing technology to break new ground and create exclusive products for your bathroom.

All products offer a huge variety of customization possibilities to fulfill your requests.

We alter the common awareness: Changing perceptions.

THE DESIGNER

Svenja Nesch is an interdisciplinary designer whose creative process is driven by a fascination for materiality, color harmony and surface texture.

She discovers creative potential and reveals new perspectives. The goal is always an aesthetic synergy of material and form.

Her creativity is reflected in the SKANDIKA collection through her inspiration from nature and its textures.

THE DESIGN

EXCITING, UNIQUE, DIVERSE

VESTA

VESTA BRED

JAG

TIGU

— OUR MATERIAL —

Sand is a natural and sustainable material with which many people have a **personal connection**.

The most influencing experiences are our memories as a child in the sandbox as well as holidays at the sea or in the desert. Sand is often associated with contradictory properties that underline its versatility. It can be hard and rough, but at the same time warm and comforting.

Sandhelden uses these contrasting associations and inspire our customers with a unique approach. In this process the company changes the general perception of sand and presents it in a form and variety never seen before.

Sand is the new design material that turns visions and new forms of creativity into reality. The use of the most innovative 3D sand printing technology allows unlimited freedom of design.

In this patented process, Sandhelden only uses pure and natural quartz sand. This is sourced in Bavaria and it guarantees a completely regional production of the washbasins.

THE CHARACTERISTICS OF OUR PRODUCTS

Scratch resistance

Cleanability

UV protection

Resilient

— HIGHLY INDIVIDUAL — OUR ONLINE CONFIGURATOR

With our configurator you can individually choose the shape, color, design and size of your washbasin.

Send us your configuration for a personal offer by e-mail.

THE FORM
FROM ROUND
TO SQUARE

THE SIZE
VARIABLE

Diameter: from 20 to 80 cm
Height: from 10 to 120 cm

THE COLOUR ENDLESS

All washbasins can be manufactured in our **standard colors** below.

Our technology also enables the coating of Washbasins in your **individual color**. Contact us for your personal request.

Glacier White	Ivory White	Lavender Grey	Stormy Grey	Charcoal Black	Ocean Blue	Olive Green
						
RAL 9003	RAL 1013	RAL 7040	RAL 7043	RAL 9017	RAL 5023	RAL 6011

— SKANDIKA COLLECTION —

VESTA

Origami - the precise and creative Japanese art of paper folding was the inspiration for this delightful design of clear ridges and even rhombic figures.

Modern and harmonious, the result is a delightful interplay of light and shadow, which this washbasin brings to life again and again, depending on the direction and type of lighting.

VESTA is at first glance a design object that sets very special accents in every bathroom - an eye-catcher in the best way.

— SKANDIKA COLLECTION —

VESTA BRED

The design of VESTA BRED was also inspired by Japanese origami.

Despite its initially similar line to VESTA, the design is clearly distinguished by slightly more open surfaces that give it additional calm as an object.

Particularly impressive is the gentle interplay of light and shadow, which makes the design appear new and interesting from every perspective. The particularly clear structure of VESTA BRED makes it an exciting and relaxing eye-catcher in any bathroom.

— SKANDIKA COLLECTION —

KORALL

The name by itself represents natural design. Like a small coral reef, the large washbasin bowl made of printed sand radiates its aesthetic charms.

The organic design language of surrounding and curved lines creates an extremely filigree impression, which follows the natural model and sets impressively significant accents in every bathroom.

— SKANDIKA COLLECTION —

JAG

Relief-like, fine-grained structure and yet a little bit the impression of a carefully woven wicker basket.

JAG offers a particularly charming contrast of strictly geometric lines, which seem to dissolve again and again through light and shadow, and a flatteringly smooth inner surface, which almost seems to be covered with fine, matt silk fabric.

JAG reinvents itself again and again in a particularly noble and multi-faceted way, according to the type of lighting.

— SKANDIKA COLLECTION —

TIGU

TIGU is inspired by sea waves that run out on the beach, which have decided to use strict geometry. The angular diagonal structure of the relief winding in an ascending spiral around the washbasin determines the appearance of TIGU.

A geometric aesthetic that is harmonious and natural. Individual and unique, this washbasin shapes the design of the room and offers new and interesting perspectives every day.

OUR PROCESS

STEP 1

UNLIMITED POSSIBILITIES
DUE TO 3D PRINTING

STEP 2

CAREFUL REMOVAL
OF THE PRINTED OBJECT

STEP 3

Size: 35 x 35 x 16 cm

Colour: Sand Yellow (individual colour)

The **LOTUS washbasin** was developed in a creative collaboration with the Indian design studio INPUT-A. It represents one of the many special portfolio editions from Sandhelden's cooperative work with various designers.

The Lotus is in India since ancient times a symbol of purity and perfection and it unfolds its incomparable beauty on the water surface.

Inspired by old Indian marble washbasins in the form of lotus blossoms the sink finds an elegant and exotic way of transforming the shape in a modern context.

The design imitates the effect of collecting water on the leaves of water lilies.

SPECIAL EDITION

Model: LOTUS

Size: 63 x 63 x 20 cm

Colour: Charcoal Black

Designed by Studio INPUT-A

Sandhelden represents more than just individual washbasins from sand. Furthermore, the company commits itself to other living areas.

The lamp collection VORONOI shows the versatility of sand and 3D printing.

Be inspired by the diverse product portfolio and discover exclusive designs for your home.

Model: BARA (custom-made)

Form: round

Size: 30 x 30 x 13 cm

Colour: Dark Lava
